

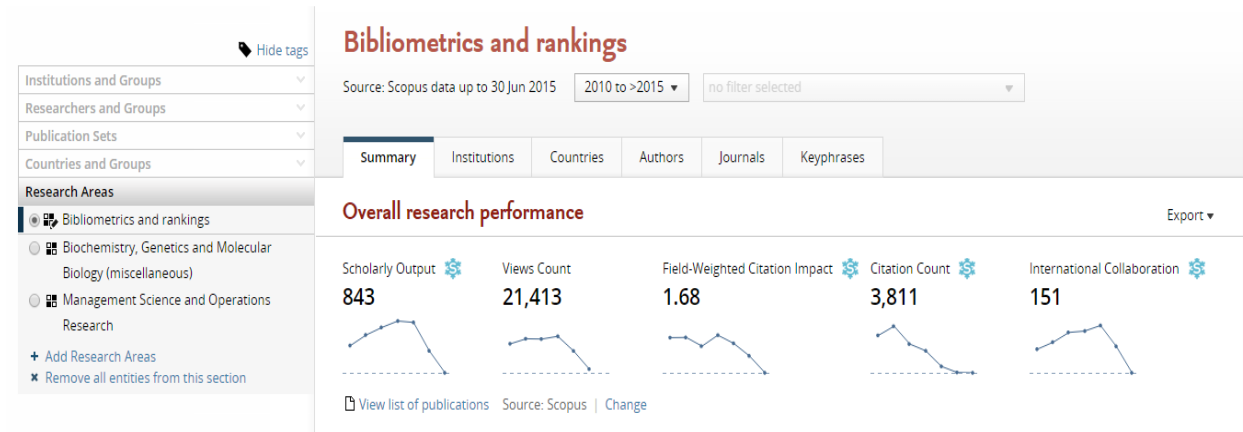

FIGURE 14.4 Using SciVal Trends

Select a research area: I created Bibliometrics and rankings

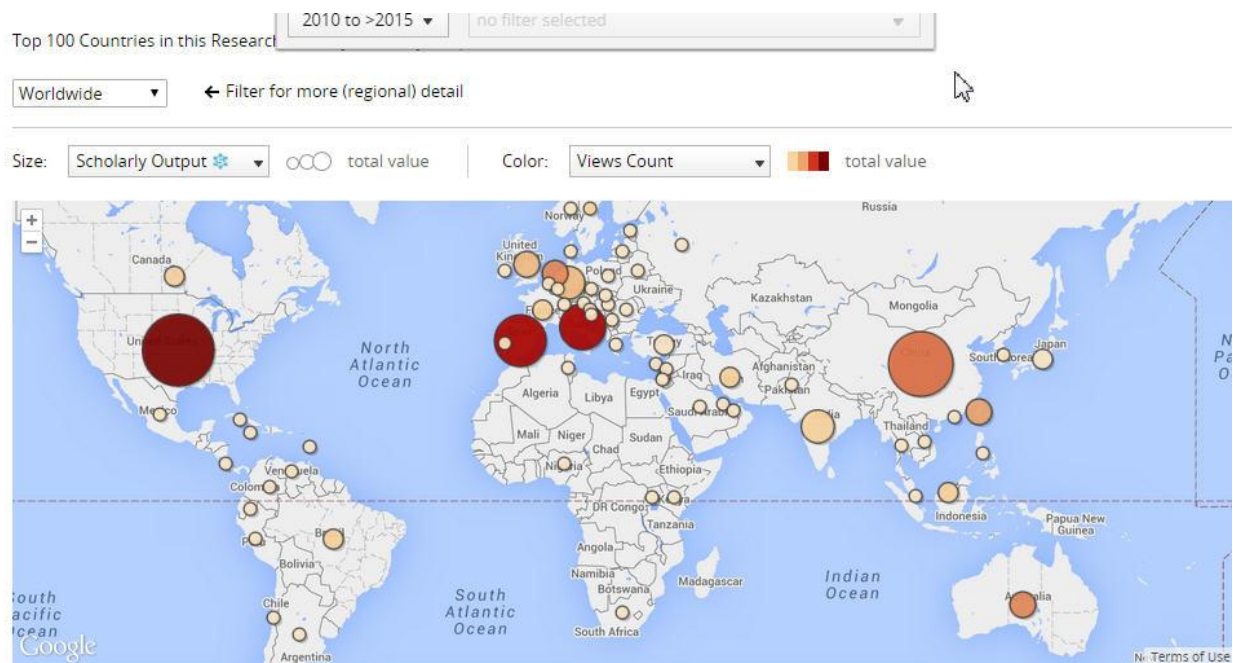

Summary displays Scholarly output, “views count”, FWCI, citation count and international collaboration as well as 50 top phrases, as shown below.

Top 50 keyphrases by relevance, based on 843 publications | [Learn about keyphrase calculations](#)

Selecting countries displays a map:

The map illustrates that the US, China, Spain and Italy lead the world in publications on bibliometric rankings. Data are also available in tabular form for top journals, authors, and keywords.

See Usage Guidebook [\(March 2015\)](#). [Usage Guidebook, v. 1.01 accessed September 4, 2015](http://www.elsevier.com/_data/assets/pdf_file/0007/53494/ERI-Usage-Guidebook-1.01-March-2015.pdf) [http://www.elsevier.com/\\_data/assets/pdf\\_file/0007/53494/ERI-Usage-Guidebook-1.01-March-2015.pdf](http://www.elsevier.com/_data/assets/pdf_file/0007/53494/ERI-Usage-Guidebook-1.01-March-2015.pdf) for additional information on the new usage metrics incorporated into Trends.
